Section 3 - Hazards Identification

Emergency Overview

Appearance: Clear, colorless solution
Danger! Corrosive. Flammable. Causes burns by all exposure routes.
Target Organs: Eyes, skin, respiratory and gastrointestinal systems, teeth

Potential Health Effects

Eye:
Eye contact with liquid or vapors may cause irritation, burns, swelling, damage to the cornea and conjunctiva resulting in blurred or partial loss of vision.

Skin:
May cause irritation to skin with burns and scar tissue. Skin contact may result in blisters and brown or yellow stains.

Ingestion:
May cause gastrointestinal burns with nausea, vomiting and diarrhea. Vomiting and diarrhea of dark blood may occur; asphyxia from throat swelling. Stomach and esophagus may become perforated.
Inhalation:
May cause respiratory irritation, burns, headache, dizziness, and weakness. Exposure to 50ppm acetic acid is intolerable for most individuals.

Chronic:
Prolonged or repeated contact may cause dermatitis, conjunctivitis, dental erosion, tooth discolorization, jaw necrosis, nasal ulceration, laryngitis, bronchitis, pneumonia and gastrointestinal disturbances. Acetic acid sensitization dermatitis from prolonged exposure can occur.

Section 4 - First Aid Measures

Eyes:
Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower lids until no evidence of chemical remains. Get medical aid at once.

Skin:
Immediately flush skin with plenty of soap and water for at least 15 minutes while removing contaminated clothing and shoes. Get medical aid at once.

Ingestion:
Do not induce vomiting. Give conscious victim 2-4 cupfuls of milk or water. Get medical aid at once. Give oxygen if respiration is depressed.

Inhalation:
Move victim to fresh air immediately. Give artificial respiration if necessary. If breathing is difficult, give oxygen. Get medical aid at once.

Notes to Physician:
Treat symptomatically and supportively.

Section 5 - Fire Fighting Measures

General Information:
As in any fire, wear a self-contained breathing apparatus in pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear. Flammable liquid. Avoid breathing corrosive vapors. Vapors are heavier than air and may travel considerable distance and flash back from source of ignition. Do not get water inside container.

Extinguishing Media:
For small fires, use dry chemical, carbon dioxide, water spray or alcohol-resistant foam.

Autoignition Temperature:
867°F (464°C)

Flash Point:
104°F (40°C)

NFPA Rating:
CAS# 64-19-7: Health-3, Flammability-2, Instability-0
CAS# 7601-90-3: Health-3, Flammability-0, Instability-3

Explosion Limits:
Lower: 5.4 Upper: 16

Section 6 - Accidental Release Measures

General Information:
Use proper personal protective equipment as indicated in Section 8.

Spills/Leaks:
Absorb liquid with inert or neutralizing substance such as fuller's earth, cement powder, fly ash, sand. Scoop material into suitable (plastic or glass) container, and label for disposal. Shut off ignition sources. Avoid corrosive vapors. Isolate and ventilate spill area.

Section 7 - Handling and Storage

Handling:
Wash thoroughly after handling. Do not ingest or inhale. Do not get in eyes, on skin, or on clothing. Wash contaminated clothing before reuse. Use only in a well ventilated area.

Storage:
Store protected from heat and ignition sources. Keep out of sewers and drains. Keep away from combustible materials.

Section 8 - Exposure Controls, Personal Protection

Engineering Controls:
Facilities using or storing this material should be equipped with an eyewash and safety shower. Use adequate general and local ventilation to keep airborne levels below the permissible exposure limits.
